FALL PLANTING FOR 1936.

The past spring has been exceptionally favorable for producing fine quality bulbs of all kinds. Our fields are state inspected each year, also the bulbs at digging time and each shipment will carry a certificate to that effect. Our rapidly growing list of pleased customers is evidence our policy of sending the best quality bulbs, honestly graded as to size and full count is appreciated.

GUARANTEE

We guarantee all stock true to name and to please on arrival. Further than this we cannot go, for we have no control over your climate or growing conditions. If for any reason you are not perfectly pleased with shipment, notify us at once and it will promptly be made right or your money refunded.

TERMS

PRICES PREPAID, unless otherwise stated. Cash or 25 per cent with order and balance C. O. D. Stamps for small orders are welcome.

DAFFODILS

The following list covers a wide range of varieties, but if there are certain ones not listed, please let us know as we may be able to supply them.

September is the best planting time and not later than mid-October if possible. It is to your interest as well as ours to order early, for we must replant unsold stock before it becomes too late for bulbs to root before cold weather. These bulbs should be planted 6 or 8 inches deep and about that far apart and may be left two or three years when dividing should be necessary. Tops may be removed when they turn yellow, and may be dug soon after and dried.

FOLLOWING PRICES PREPAID. If large quantity is desired ask for wholesale list. DN. means double nose, large bulbs showing two or more flower centers. SN. means single nose, or round bulbs with one flower center. 6 at dozen rate.

Lily Bulbs

All of the lily bulbs listed herein, are so far as we know hardy or reasonably so. It may be that in districts with very severe winters some covering of straw or leaves will be helpful.

Large and medium size bulbs should be set upright, covered with 6 inches or so of soil, bulblets about 3 inches. Candidum and Testaceum seem to prefer shallow planting, 2 or 3 inches of soil on top of bulbs and must be fall planted. A well worked and fertile soil, kept free of weeds and grass should be used. While some shade is agreeable, bulbs should not be set too near heavy rooting shrubery or trees.

FOLLOWING PRICES PREPAID. Good strong bulbs according to variety, that will please you. 6 at dozen rate.

AMABILE—Somewhat like Tenuifolium, with dark red blooms spotted black. Blooming size bulbs 25 cents; 12 for \$2.50. Bulblets, 12 for 25 cents.
